

ANNEX 2: Summary table on participation and non-participation (paragraph 3.2)

		Number of dwellings	Number of households	Number of individuals
1	<p>Total released sample cases</p> <p>The number of sampling units initially selected from the sampling frame.</p> <p>► [1] = [2] + [3] + [6]</p>	Not relevant	Not relevant	27600
2	<p>Ineligible sample cases/ out-of-scope units</p> <p>The unit does not belong to the population of interest for the survey although it is included in the sampling frame.</p>	Not relevant	Not relevant	1978
2.1	<p>Non-existent units</p> <p>The unit does not exist although it was included in the sampling frame due to errors (house/ building not existing, no one living in the building/ on the address).</p>	Not relevant	Not relevant	0
2.2	<p>Changes in status</p> <p>The unit has changed its status and becoming out of scope for the survey (e.g. change of residence for a household, selected individual died between the reference date of the sampling frame and the moment of the interview, etc.).</p>	Not relevant	Not relevant	1927
2.3	<p>Out of target units</p> <p>The unit has never been in-scope although it was included in the frame due to an inclusion error.</p>	Not relevant	Not relevant	51
2.4	<p>Other ineligible</p> <p>Other types of ineligibility encountered. Please specify the reasons for this kind of ineligibility:</p>	Not relevant	Not relevant	0
3	<p>Eligible sample cases/ in-scope units</p> <p>The unit belongs to the population of interest for the survey (both non-response and response cases).</p> <p>► [3] = [4] + [5]</p>	Not relevant	Not relevant	25622
4	<p>Non-response cases/ non-participation</p> <p>Units for which no information could be obtained.</p>	Not relevant	Not relevant	11430
4.1	<p>Non-contact</p> <p>A unit which has been impossible to contact (e.g. nobody was at home or wrong address).</p>	Not relevant	Not relevant	4369

4.2	<p>Refusal E.g. the selected household or individual was contacted but refused to take part in the survey.</p>	Not relevant	Not relevant	2322
4.3	<p>Inability to respond E.g. the selected household or individual was unable to participate due to language barriers or cognitive or physical incapacity to respond (and no proxy interview was conducted).</p>	Not relevant	Not relevant	1
4.4	<p>Rejected interviews E.g. the selected household or individual did take part but the survey form cannot be used (poor quality - e.g. strong inconsistencies; unacceptable item-response – e.g. individual left most of the questions unanswered; survey form got lost and interview cannot be repeated).</p>	Not relevant	Not relevant	761
4.5	<p>Other non-response Other types of non-response encountered. Please specify the reasons for this kind of non-response:</p>	Not relevant	Not relevant	<p>4039 These situations correspond to disguised refusals, situations where interviewers were able to reach the sampled individual, but were never able to start an interview without obtaining a clear and direct refusal. For instance, the interview obtains an appointment for a phone interview but the sampled</p>

				individual does not pick up the phone at the time of the meeting. This behaviour being repeated until the maximum number of calls is reached.
5	Response cases/ participation Units for which the requested information could be obtained.	Not relevant	Not relevant	14192
5.1	Fully completed interview All relevant questions were answered by the respondent or by a proxy interview. Variables for which derogations were granted and variables that have not been completed in a proxy interview should not be taken into account when evaluating the completeness of the interview.	Not relevant	Not relevant	10910
5.2	Partly completed interview Not all but at least some relevant technical variables (PID, HHID, PRIMSTRAT, PSU, WGT, PROXY, REFYEAR, REFMONTH, INTMETHOD), sex and age and at least 50% of all other variables to be answered.	Not relevant	Not relevant	3282
6	Unknown eligibility Selected units with unresolved eligibility.	Not relevant	Not relevant	0
	Comments related to the table	The sampled units are individuals	The sampled units are individuals
